² *Samara State Aerospace University*

Abstract

The paper describes the mechanism of the formation of a high-voltage gas discharge, provides the experimental dependences characterizing the discharge parameters under various conditions of its existence.

Keywords: low-temperature plasma, high-voltage gas, discharge.

Citation: Kazanskiy NL, Kolpakov VA. Studies into mechanisms of generating a low-temperature plasma in high-voltage gas discharge. *Computer Optics* 2003; 25: 112-116.
